PROJECT EXPERIENCE

Child Activity Management Application — Web Based Application

- Establised a web application to manage multiple children's activities so that a parent can keep track of the activities' status and scheduling, using C#, .Net, MySQL.
- Built user authentication and authorization mechanism to support user login and management of authorized data.
- Created functionality for users to create, view, update and delete child and activity records.
- Created functionality for users to search, sort, as well as generate reports to better manage child activities.

WORK EXPERIENCE

AP Investor Service Specialist — Scottrade Inc, St.Louis

May 2015 - May 2017

- Communicated directly with clients via phone or email, providing professional assistance and explanations
- Processed New Account applications. Verified and acquired additional documentation when needed
- Assisted with international account maintenance processes, including fund deposits and withdrawals, margin application and internal account transfer
- Worked with original and online W-8BEN validation and 3-year W-8BEN updates
- Performed Politically Exposed Persons (PEP), Office of Foreign Assets Control (OFAC) and Anti-Money Laundry (AML) screening
- Conducted a special re-organization project with the team covering 60,000 accounts, and able to complete tracking client's status and finish the project within 8 months, 6 months ahead of schedule
